# DEV-BF548-Lite Development Board
Blackfin

The DEV-BF548-Lite Development Board is designed as a development and application board for the high performance CM-BF548 Core Module. It supports the USB OTG2.0 capability of the CM-BF548 Core Module and adds the feature of a 10/100Mbit industrial ethernet controller. The development boards provides all interfaces on dedicated connectors or expansion connectors. Extender boards can be plugged on top of the Development Board in order to enable additional interfaces.

Features

COMPATIBLE WITH	CM-BF548
