For further information on technology, delivery terms and conditions and prices please contact Bluetechnix (<http://www.bluetechnix.com>).

Warning

Due to technical requirements components may contain dangerous substances.

1 Introduction

The Core Module eCM-BF561 is optimized for performance and parallel data processing. The module integrates processor, RAM, flash and power supply at a size of 44x33mm! It is based on the high performance ADSP-BF561 from Analog Devices. The eCM-BF561 is designed for industrial and commercial applications. It addresses 128MByte SDRAM via its 32bit wide SDRAM bus and has an onboard NOR-flash of 32MByte.

1.1 Overview

Figure 1-1 shows the main components of Core Module eCM-BF561.

Figure 1-1: Main components of the eCM-BF561 module

- **Analog Devices Blackfin Processor BF561**
 - Industrial version (see chapter 10)
 - ADSP-BF561SBBCZ-5A (Rev 0.5; -40° - 85°C)
 - Commercial version (see chapter 10)
 - ADSP-BF561SKBCZ-6A (Rev 0.5; 0° - 70°C)
- **128 MB SDRAM**
 - Industrial version (see chapter 10)
 - IS42S16320B-7BL
 - SDRAM Clock up to 133MHz
 - 2x (32Mx16, 512Mbit at 3.3V)
 - Commercial version (see chapter 10)
 - IS42S16320B-7BL
 - SDRAM Clock up to 133MHz
 - 2x (32Mx16, 512Mbit at 3.3V)
- **32 MB of Flash**
 - PF48F4000P0ZBQE (16Mx16, 128Mbit at 3.3V; all 32MByte addressable)
 - Additional flash memory can be connected through the expansion board as parallel Flash using asynchronous chip select lines or as a SPI flash.

- **Core Voltage Regulator**
 - 1.35V
- **Low Voltage Reset Circuit**
 - Module resets if power supply goes below 2.93V for at least 140ms
- **Connectors**
 - SPORT 0
 - SPORT 1
 - UART
 - SPI
 - PPI-0 (Parallel Port Interface 0)
 - PPI-1 (Parallel Port Interface 1)
 - GPIO's
 - Data Bus
 - Address Bus, Control Signals
 - nRESET
 - Boot-Mode
 - JTAG
 - Power Supply

1.2 Applications

- Parallel digital signal processing
- Imaging and consumer multimedia
- Set top boxes
- Automotive vision systems
- Portable media players
- Digital video camera systems
- Video conference applications

2 General Description

2.1 Functional Description

Figure 2-1: Functional Overview

2.2 Boot Mode

By default the Boot Mode is set to 00 (BMODE0 pin = LOW, BMODE1 pin = LOW). The boot mode pins are available on the connectors.

BMODE1-0	Description
0 0	Execute from 16-bit external memory (Bypass Boot ROM) (uBoot, uClinux)
0 1	01 Boot from 8-bit/16-bit flash (BLACKSheep® OS)
1 0	Boot from SPI host slave mode
1 1	Boot from SPI serial EEPROM (16-, 24-bit address range)

Table 2-1 Boot Mode

2.3 Memory Map

2.3.1 Core Module Memory

Memory Type	Start Address	End Address	Size	Comment
FLASH *)	0x20000000	0x21FFFFFF	32MB	Intel PF48F4000P0ZBQE
SDRAM	0x00000000	0x07FFFFFF	128MB	32Bit Bus, 2x ISSI IS42S16320-7BL

Table 2-2: Memory Map

*) Please be aware that you have to unlock the flash before starting an erase process!

2.3.2 Externally Addressable Memory (on connector)

The Blackfins External Bus Interface (EBI) allows connecting devices via an asynchronous memory interface.

AMS Line	Start Address	End Address	Max. Size
nAMS1	0x24000000	0x27FFFFFF	128MB
nAMS2	0x28000000	0x2BFFFFFF	128MB
nAMS3	0x2C000000	0x2FFFFFFF	128MB

Table 2-3: External Addressable Memory

3 Specifications

3.1 Electrical Specifications

3.1.1 Operating Conditions

Symbol	Parameter	Min	Typical	Max	Unit
V_{IN}	Input supply voltage	3.0	3.3	3.6	V
$I_{3V3} @ 25^{\circ}C$	3.3V current	-	700	-	mA
V_{OH}	High level output voltage	2.4	-	-	V
V_{OL}	Low level output voltage	-	-	0.4	V
I_{IH}	IO input current	-	-	10	μA
I_{OZ}	Three state leakage current	-	-	10	μA
f_{CCLK}	Core clock frequency	100	-	600/500*	MHz

Table 3-1: Electrical characteristics

* The maximal core clock frequency depends on the used temperature grade.
600 MHz for the eCM-BF561-C-C-Q25S128F32 with ADSP-BF561SKBCZ-6A
500 MHz for the eCM-BF561-C-I-Q25S128F32 with ADSP-BF561SBBCZ-5A

3.1.2 Maximum Ratings

Stressing the device above the rating listed in the absolute maximum ratings table may cause permanent damage to the device. These are stress ratings only. Operation of the device at these or any other conditions greater than those indicated in the operating sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

Symbol	Parameter	Min	Max	Unit
V_{IN}	Input supply voltage	-0.3	4.1	V
V_{IO}	Input or output voltage	-0.5	3.6	V
I_{OH} / I_{OL}	Current per pin	0	10	mA
T_{AMB}	Ambient temperature	-40	85	$^{\circ}C$
T_{STO}	Storage temperature	-55	150	$^{\circ}C$
ϕ_{AMB}	Relative ambient humidity	-	90	%

Table 3-2: Absolute Maximum Ratings

3.1.3 ESD Sensitivity

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

4 Connector Description

4.1 Connector X1

The mating connector for X1 is the FX10A-100P/10-SV from Hirose.

Please mind the mounted pull up, pull down and serial resistors on the Core Module (see column "Type").

Table 4-2 - Connector Description X2

5 Application Information

5.1 Supply Voltage Decoupling

For better stability we recommend to add a 100nF capacitor to each power supply pin and an additional 47 μ F tantalum capacitor to the V_{IN} voltage rail next to the module.

5.2 Reset circuit

The integrated Reset circuit monitors the 3.3V power rail. If this voltage drops below 2.93V, the $\overline{\text{RESET}}$ signal will be asserted. If the 3.3V voltage domain rises above this threshold, $\overline{\text{RESET}}$ will be kept low for 140 to 280ms and will be released afterwards.

The $\overline{\text{RESET}}$ signal is an open collector output with an internal pull-up resistor of 470 Ω . This signal can be used as external manual reset by connecting an external push-button that ties the signal to ground.

Figure 5-1: Reset circuit

5.3 Application Example Schematics

Have a look at our eDEV-BF5xx schematics, which can be found at <http://www.bluetechnix.com/goto/edev-bf5xx> to get application examples.

6 Mechanical Outline

6.1 Top View

Figure 6-1 shows the top view of the mechanical outline of the eCM-BF561 Core Module. All dimensions are given in millimeters! Outline dimensions +/- 0,5mm.

Figure 6-1: Mechanical outline (top view)

6.2 Bottom View

Figure 6-2 shows the bottom of the mechanical outline of the eCM-BF561 Core Module. All dimensions are given in millimeters!

Figure 6-2: Mechanical outline and Bottom Connectors (bottom view)

6.3 Side View

Figure 6-3 shows the mechanical outline from side of the eCM-BF561 Core Module. All dimensions are given in millimeters!

Figure 6-3: Mechanical outline (side view)

6.4 Footprint

Figure 6-4: Footprint (top view)

The footprint for Altium Designer is available on request. The used connectors can be found in Table 6-1. For detailed dimensions of the connectors please see the datasheet from the manufacturer's homepage.

6.5 Connectors

Connector	Core Module	Matching Connector	Manufacturer	Manufacturer Part No.
X1		X2	Hirose	FX-10A-100S/10SV
X2		X1	Hirose	FX-10A-100P/10SV

Table 6-1: Core Module connector types

The Core Module features 2 connectors, one male and one female. The base board uses the same connectors but oriented in the opposite way.

7 Support

7.1 General Support

General support for products can be found at Bluetechnix' support site <https://support.bluetechnix.at/wiki>

7.2 Board Support Packages

Board support packages and software downloads are for registered customers only
<https://support.bluetechnix.at/software/>

7.3 Blackfin® Software Support

7.3.1 BLACKSheep® OS

BLACKSheep® OS stands for a powerfully and multithreaded real-time operating system (RTOS) originally designed for digital signal processing application development on Analog Devices Blackfin® embedded processors. This high-performance OS is based on the reliable and stable real-time VDK kernel from Analog Devices that comes with VDSP++ IDE. Of course BLACKSheep® OS is fully supported by all Bluetechnix Core-Modules and development hardware.

7.3.2 LabVIEW

You can get LabVIEW embedded support for Bluetechnix Core Modules by Schmid-Engineering AG
<http://www.schmid-engineering.ch>.

7.3.3 uClinux

You can get uClinux support (boot loader and uClinux) for Bluetechnix Core Modules at
<http://blackfin.uClinux.org>.

7.4 Blackfin® Design Services

Based on more than seven years of experience with Blackfin, Bluetechnix offers development assistance as well as custom design services and software development.

7.4.1 Upcoming Products and Software Releases

Keep up to date with all product changes, releases and software updates of Bluetechnix at
<http://www.bluetechnix.com>.

100-1214-1	eCM-BF561-C-C-Q25S128F32 (eCM-BF561)	Commercial
100-1214-1-TR	eCM-BF561-C-C-Q25S128F32 (eCM-BF561) Tape Reel (50 pcs per reel)	Commercial
100-1215-1	eCM-BF561-C-I-Q25S128F32	Industrial
100-1215-1-TR	eCM-BF561-C-I-Q25S128F32	Industrial

Table 8-1 - Mounting options

Development boards for the eCM-BF561 are listed in the following table.

Article Number	Name	Description
100-2342-2	eDEV-BF5xx	Blackfin Evaluation Board
100-2350-1	CDEV-BF5xx	Camera Development Board
100-3106	CDK – Camera Development Kit	CDK Camera Development Kit with eCM-BF561 and ISM-MT9M024
100-3400	Blackfin Evaluation Starter Package	eDEV-BF5xx and eCM-BF561

Table 8-2 - Development boards for eCM-BF561

NOTE: Custom Core Modules are available on request! Please contact Bluetechnix (office@bluetechnix.com) if you are interested in custom Core Modules.

9 Dependability

9.1 MTBF

Please keep in mind that a part stress analysis would be the only way to obtain significant failure rate results, because MTBF numbers just represent a statistical approximation of how long a set of devices should last before failure. Nevertheless, we can calculate an MTBF of the Core Module using the bill of material. We take all the components into account. The PCB and solder connections are excluded from this estimation. For test conditions we assume an ambient temperature of 30°C of all Core Module components except the Blackfin® processor (80°C) and the memories (70°C). We use the MTBF Calculator from ALD (<http://www.aldservice.com/>) and use the reliability prediction MIL-217F2 Part Stress standard. Please get in touch with Bluetechnix (office@bluetechnix.com) if you are interested in the MTBF result.

10 Product History

10.1 Version Information

10.1.1 eCM-BF561-C-C-Q25S128F32 (eCM-BF561)

Version	Component	Type
1.1.1	Processor	ADSP-BF561SKBCZ-6A (Rev 0.5)
	RAM	IS42S16320B-7BL
	Flash	PF48F4000P0ZBQE (32MB)
1.1.2	Processor	ADSP-BF561SKBCZ-6A (Rev 0.5)
	RAM	IS42S16320B-7BLI
	Flash	PF48F4000P0ZBQE (32MB)
1.1.3	Processor	ADSP-BF561SKBCZ-6A (Rev 0.5)
	RAM	IS42S16320B-7BL
	Flash	PF48F4000P0ZBQE (32MB)
1.1.4	Processor	ADSP-BF561SKBCZ-6A (Rev 0.5)
	RAM	IS42S16320D-7BL
	Flash	PF48F4000P0ZBQE (32MB)

Table 10-1: Overview eCM-BF561-C-C-Q25S128F32 product changes

10.1.2 eCM-BF561-C-I-Q25S128F32

Version	Component	Type
1.1.1	Processor	ADSP-BF561SBBCZ-5A (Rev 0.5)
	RAM	IS42S16320B-7BLI
	Flash	PF48F4000P0ZBQE (32MB)
1.1.2	Processor	ADSP-BF561SBBCZ-5A (Rev 0.5)
	RAM	IS42S16320D-7BLI
	Flash	PF48F4000P0ZBQE (32MB)

Table 10-2: Overview eCM-BF561-C-I-Q25S128F32 product changes

10.2 Anomalies

Version	Date	Description
V1.0	2011 02 11	No anomalies reported yet.
V1.1	2011 07 18	No anomalies reported yet.

Table 10-3: Overview product anomalies

11 Document Revision History

Version	Date	Document Revision
1	2009 12 03	First release V1.0 of the Document
2	2011 07 18	Updated document with industrial version.
3	2011 10 18	Typical I_{3V3} set to 700mA
4	2013 06 17	ARDY pin set to input, FLASH_WP renamed to nFLASH_WP (active low) Update to new CI
5	2014 11 11	Add Note to core clock frequency Update product history
6	2015 07 21	Mating connector types added for X1 and X2

Table 11-1: Revision history

12 List of Abbreviations

Abbreviation	Description
ADI	Analog Devices Inc.
AI	Analog Input
AMS	Asynchronous Memory Select
AO	Analog Output
CM	Core Module
DC	Direct Current
DSP	Digital Signal Processor
eCM	Enhanced Core Module
EBI	External Bus Interface
ESD	Electrostatic Discharge
GPIO	General Purpose Input Output
I	Input
I²C	Inter-Integrated Circuit
I/O	Input/Output
ISM	Image Sensor Module
LDO	Low Drop-Out regulator
MTBF	Mean Time Between Failure
NC	Not Connected
NFC	NAND Flash Controller
O	Output
OS	Operating System
PPI	Parallel Peripheral Interface
PWR	Power
RTOS	Real-Time Operating System
SADA	Stand Alone Debug Agent
SD	Secure Digital
SoC	System on Chip
SPI	Serial Peripheral Interface
SPM	Speech Processing Module
SPORT	Serial Port
TFT	Thin-Film Transistor
TISM	Tiny Image Sensor Module
TSC	Touch Screen Controller
UART	Universal Asynchronous Receiver Transmitter
USB	Universal Serial Bus
USBOTG	USB On The Go
ZIF	Zero Insertion Force
